

CESSNA SERVICE LETTER SLN-40

DATE: 05-06-47

SUBJECT. Airplane Flight Manual

We have now worked out an airplane flight manual in accordance with the requirements set forth in CM release No 227. It's general make up is similar to the manual now required for current airplanes designed and built under CAR 03. This document is a part of the required paperwork in the airplane and on new airplanes beginning with serial number 13619. It eliminates CAA form 309 which has been previously supplied.

This document also supercedes and replaces the temporary Airplane Operating Limitations Manual supplied recently. A supply sufficient to take care of every airplane delivered to each distributor is being forwarded. They are to be supplied to each owner promptly through the dealer organization and being part of the licensing paperwork. It is to be kept in the airplane at all times.
